

New SPF Digital Championship 2023

We invite Clubs to enter our 2023 event, with a new format and more Individual Awards to be won than in previous years!

This new format reflects features of both the 'Interim' and the 'Normal' Digital Championship events. We hope you find this new format meets the needs of all of our SPF Clubs who have enjoyed entering either event in the past.

The SPF Digital Championship 2023 will be run as two separate competitions, both run on the same day, by three Judges, as an audience event on Sunday 19th Nov 2023 at Victoria Hall, Dunblane. It will be great to be able to meet up with everyone again, at our new venue only 10 minutes from Stirling Court. Full venue details are supplied separately.

Your Club requires to choose which Competition to enter either 'The Plate Competition' or 'The Bowie Competition'. You cannot enter both, so please choose which of these competitions you wish to enter from the following entry requirements.

Online Entry Closes 9th November 2023. We still require paperwork and payment to be sent to us, closing date for receipt of these is by 16th Nov.

TIE BREAKS

SPF TIE BREAK PROCEDURE (Agreed 7 March 2010)

One - No tiebreak will be used in either of these competitions to decide position. If two, or more, clubs tie for first place they will be awarded the trophy equally and there is also no need to separate 2nd, 3rd or lower equal places.

Two - If it is necessary to decide between two or more clubs tied for the same position in order to say who will be invited to represent the SPF at a national PAGB Championship then this will be calculated as follows.

Where more than two clubs are tied then any Club which can be separated by that step will be dropped even if two or more have to proceed to the next step.

Step 1. Count the Awards made to each Club in the competition and choose the Club with the most – whatever value the awards are. I.E., 3 HC are better than 1 Gold medal plus 1 Silver medal. If this does not separate the clubs take the Club with most gold medals, then most silver medals and so on until they can be separated.

Step 2. If Step 1 is inconclusive, then count back the highest Scores. I.E. The Club with the most 15s Followed by the most 14s, 13s, 12s etc until the clubs can be separated.

Step 3. If Steps 1 and 2 are inconclusive a Random Draw conducted by the President or his/her nominee will decide the issue.

See the following Nature Details for full info. On Quotas and for Nature Award eligibility -

SPF NATURE DEFINITION – *Now for Best Nature Award only. Please indicate eligible images when completing your entry on our website.*

NATURE PHOTOGRAPHY is restricted to the use of the photographic process to depict all branches of natural history, except anthropology and archaeology, in such a fashion that a well-informed person will be able to identify the subject material and certify its honest presentation. The story telling value of a photograph must be weighed more than the pictorial quality while maintaining high technical quality. Human elements shall not be present, except where those human elements are integral parts of the nature story such as nature subjects, like barn owls or storks, adapted to an environment modified by humans, or where those human elements are in situations depicting natural forces, like hurricanes or tidal waves. Scientific bands, scientific tags or radio collars on wild animals are permissible. Photographs of human created hybrid plants, cultivated plants, feral animals, domestic animals, or mounted specimens are ineligible, as is any form of manipulation that alters the truth of the photographic statement.

No techniques that add, relocate, replace, or remove pictorial elements except by cropping are permitted. Techniques that enhance the presentation of the photograph without changing the nature story or the pictorial content, or without altering the content of the original scene, are permitted including HDR, focus stacking and dodging/burning. Techniques that remove elements added by the camera, such as dust spots, digital noise, and film scratches, are allowed. Stitched images are not permitted. All allowed adjustments must appear natural. Colour images can be converted to greyscale monochrome. Infrared images, either direct-captures or derivations, are not allowed. Images used in Nature Photography competitions may be divided in two classes: Nature and Wildlife.

Images entered in Nature sections meeting the Nature Photography Definition above can have landscapes, geologic formations, weather phenomena, and extant organisms as the primary subject matter. This includes images taken with the subjects in controlled conditions, such as zoos, game farms, botanical gardens, aquariums and any enclosure where the subjects are totally dependent on man for food.

Images entered in Wildlife sections meeting the Nature Photography Definition above are further defined as one or more extant zoological or botanical organisms free and unrestrained in a natural or adopted habitat. Landscapes, geologic formations, photographs of zoo or game farm animals, or of any extant zoological or botanical species taken under controlled conditions are not eligible in Wildlife sections. Wildlife is not limited to animals, birds and insects. Marine subjects and botanical subjects (including fungi and algae) taken in the wild are suitable wildlife subjects, as are carcasses of extant species. Wildlife images may be entered in Nature sections of Exhibitions.

New SPF Digital Championship 2023

LOOKS LIKE NATURE IS NATURE – *Should be used for the Nature quota in SPF events only, except for those eligible for the Best Nature Award which should comply with the above Definition. Images that only comply with this 'Looks Like Nature' definition should not be indicated on our website as Nature when making your entry.*

Nature means Images where living organisms are the primary subject matter. The story telling value of an Image will normally be weighed more than the pictorial quality.

Nature includes:

- Images taken with subjects in controlled conditions such as zoos, game parks, botanic gardens, aquariums, and enclosures where the subjects are dependent on man for food. Scientific bands, tags or collars are permissible.

Nature excludes:

- Images where the subjects are obviously domestic animals or plants.
- Images where an obviously artistic treatment has been applied.

Processing of the captured image, by cropping, exposure adjustment, colour correction, noise minimisation, dodging/burning, HDR, focus stacking and sharpening, is permitted, as is cloning of image defects and minor distractions including overlapping elements. An Image appearing to meet these criteria will be accepted as Nature. The Judges will normally assume that any Image presented to them is eligible. Access to some biological subjects may be restricted. Where that is relevant, then Photographers warrant that they have followed relevant codes of practices and hold any necessary licences.
