

NEW STANDARD RESOLUTION 1600px by 1200px FROM 1 JAN 2017

With the SPF and PAGB purchase of the new Canon WUX500 projectors at the beginning of this year, it has been necessary to timetable when both organisations will introduce 1600 x 1200 as our standard projection size requirement for all Competitions.

The SPF announced this in January, and the PAGB have since agreed the same 'Standard Resolution' for their events, so we are taking this opportunity to remind you that this NEW Standard Resolution for all SPF Events will be in place for all events and Competitions from 1st January 2017. The PAGB change will come in to force in July 2017 for Warwick.

We are reminding you of this now, as some Clubs may choose to begin collecting in images from their members now in the larger sizes. Some Clubs have already introduced this bigger size for their competitions, if they have also purchased a new projector.

1400 x 1050 will continue to be accepted in all SPF Competitions, along with smaller image sizes. However; we strongly suggest that you do not submit image sizes smaller than 1400 x 1050, as they will be significantly smaller on the screen.

To give you an idea how these resolution sizes compare when projected on a screen please visit the SPF Guidance Area on the SPF Website and download "**An Insight into Resolutions**". You will also find an update of the "Digital Guidance Notes 1" for 1600x 1200 within this area.
